

SOUTH EAST WALES

VASCULAR NETWORK

The Future of **Vascular Services** in South East Wales

Health Boards across the region have come together to propose a new model of care for the delivery of vascular services. The new structure would offer a range of benefits to our population and make the service sustainable for the future.

These services are a vital part of our healthcare infrastructure in South East Wales.

We want to hear from you...

It is important that we hear your thoughts and opinions as we begin the development of our plans. Please visit our web page or get in touch, so we can tell you more about the proposed plans and invite you to complete our short feedback form.
